API-6A Wellhead

Tubing Spools

WDI's WTCM tubing heads feature a versatile straight bore design for single and multiple completions. This design accepts all WTC series tubing hangers and easily converts from a single completion to multiple completions with the addition of a(n) alignment pin(s).

Features

Available Sizes

- Available with 7-1/16" nominal bowl compatible with 7-5/8" production casing

Straight bore design

- Features a 45° landing shoulder capable of supporting maximum loads

Outlets

- Line Pipe Outlets
- Studded Side Outlets

Manufacturing Standard

- API-6A, PSL-1, DD, L-U, PR-1 (3M & 5M)
- API-6A, PSL-2, DD, L-U, PR-1 (10M)

Tubing Hanger Compatibility

- WTCM tubing heads accept a wide variety of tubing hanger styles including mandrel and wrap around

Bottom Preparations

- PE/BG bottom for use with PE secondary seal (standard)
- HPE bottom, for use with HPE secondary seal bushing for high pressure applications

Availability

- Additional sizes available upon request
- Available with ET (integral) style lockscrews
- Flanged top tubing heads available with slip-on weld or threaded bottoms

Tubing Spools
